

Classenroom Management Software **Netcom Desktop Manager**

How to Install:

Download:

Download the trial/full-version from the www.desktopmanager.de download area.

Installation prerequisites:

A shared networkpath (networkshare) that students- and instructor-PC can access the same way is needed.

A driveletter must be assigned to that path, this driveletter has to be the same Driveletter for students and instructor.

Example:

NETCOM Desktop Manager will be installed to server1.

On drive C: of server1 a subdirectory named „DTM“ will be created. For this subdirectory a networkshare named Server1_DTM will be created.

At Instructor- and Student-PCs Driveletter „N:“ is assigned to that share. So instructor and students will access NETCOM Desktop Manager files on Drive N:.

(Windows-command: *net use N: \\Server1\Server1_DTM*)

Important:

The way of access to NETCOM Desktop Manager programfiles must be indentically from student- and instructor-PC!

Installation of NETCOM Desktop Managers:

At the instructors PC start the Installation by double-clicking on the *SETUPEng.EXE file*. Install NETCOM Desktop Manager to the bevor created fileshare on the server; Use the assigned networkdrive:

Example:

N:\Netcom\Desktop

After Installation has finished, you can start the Instruktor-module by double-clicking the NETCOM-Desktop-Manager-Icon on the desktop, which was created during installation.

Next page ...

Configuring student-PCs:

The configuration of student-PCs is done automatically when you start the NETCOM Desktop Manager Student-Client the first time.

Important:

For the configuration of the student-clients, local administrator-rights are required.

To start the student-client call SCHUELER.EXE from the install-directory under \SCHUELER with the IP-Address of the instructor-PC as parameter.

Example:

N:\Netcom\Desktop\Schueler\Schueler.Exe 192.168.1.11

After the student-client has been started at all student-PCs you can start the Client-Configuration from the instructor-module bei clicking on the button "Update client configuration" under "Admin", "System-Configuration" from Mainmenu.

-> Admin -> System configuration -> Update client configuration

Thats it!

The Installation has been completed.

NETCOM offers free installation-support bei Installation for the installation of NETCOM Desktop Manager even for the trial-version.

Hotline: ++49 (0) 95 32 / 92 31 – 0 or SKYPE: DesktopManager.
